

## INSTALLATION GUIDE LAN-WMBUS-R4X-M-LR-X REV 1.0

### 1 MOUNTING

		
<p>Start with unscrewing the 4 plastic screws. Remove the cover.</p>	<p>Mount the device either using the pole mounting quipment or using 4 standard screws.</p>	<p>Connect the 230 V AC/DC cable to the two connectors. This must be done by trained professionals!</p>
		
<p>Make sure to tighten the cable gland so that it firmly holds the cable</p>	<p>Put back the cover and secure it by using the 4 plastic screws.</p>	<p>Mount the desired antennas. Make sure to use TX antennas without large gain due to output regulations. The RX antenna can be of any size.</p>
